Lehlohonolo Sethibe

Aspiring Software Developer | Junior Developer

Contact Number: 0817954600	Location: Gauteng, Johannesburg
Email address: LehlohonoloSethibe@outlook.com	GitHub: https://github.com/Lehlohonolo59 Personal Portfolio: LehlohonoloSethibe

Motivated and adaptable IT professional with a Diploma in Software Development from the IIE and a growing portfolio of Microsoft certifications. Passionate about software development across the full stack — frontend, backend, and cloud — with a commitment to continuous learning and real-world application.

Currently employed as a Junior Developer at Econarch Consulting and IT Services, contributing to hands-on projects that build practical experience in software development, system design, and modern cloud technologies. Brings a problem-solving mindset, technical foundation, and a drive to grow within the ever-evolving tech landscape.

Experience

Junior Developer EconArch Consulting and IT Services (Pty) Ltd | August 2025 – Present

- Contributing to the development of a Digital Health Records (DHR) web application using C#, .NET, Azure SQL, HTML, CSS, and JavaScript.
- Building and maintaining CRUD functionality to capture, manage, and retrieve patient data.
- Designing and querying Azure SQL databases to support application data workflows.
- Collaborating with senior developers on system architecture, code reviews, and iterative development improvements.

Intern – Support & Data/AI Teams EconArch Consulting and IT Services (Pty) Ltd | August 2024 – July 2025 *(12-Month Internship)*

- Provided technical support for Microsoft 365 services, including Outlook, Teams, and Intune.
- Managed device enrollment and enforced compliance policies using Microsoft Intune.
- Monitored and escalated security incidents using Microsoft Defender tools.
- Maintained documentation, handled ticket management, and produced support reports.

Learnership Program Participant – Microsoft Data & AI Track Netcampus (Microsoft Training Partner) | February 2024 – January 2025 *(12-Month Learnership)*

- Completed a comprehensive Microsoft-certified learnership focused on Data & AI technologies, covering Azure Data Fundamentals and AI Fundamentals.

Projects

1. **Digital Health Records (DHR) Web Application** *(Work Project) C#, .NET, Azure SQL, HTML, CSS, JavaScript*

   Developing a web-based digital health records system to capture and manage patient information, including database design, CRUD functionality, and integration with Azure SQL for data storage and retrieval.

2. **Disaster Alleviation Foundation Web App** *ASP.NET, Azure SQL*

   Developed a web application to manage donations for disaster-affected communities, enabling structured data capture and persistent storage through an Azure SQL database.

3. **Simple GUI CRM Application** *Java*

   Built a desktop CRM application with a graphical user interface to capture, manage, and display customer information.

Skills

Technical Skills

Software & Application Development: Proficient in Java, C#, ASP.NET, Kotlin, JavaScript, HTML, and CSS, with practical experience building web and desktop applications.

Database & Cloud Platforms: Working knowledge of MySQL, Oracle, and Azure SQL, with hands-on experience in Microsoft Azure services including Azure AI, cloud environment management, and Azure Data fundamentals.

Professional & Interpersonal Skills

Collaborative & Analytical: Strong problem-solving abilities with a proactive mindset — comfortable working in team environments, engaging with clients, and contributing to shared development goals.

Growth-Oriented: Committed to continuous learning and professional development, with a focus on deepening expertise in programming, database administration, and applied project management.
